Close Position and Open Position Triads

A triad is in **close position** when the notes are spaced within an octave.

A triad is in **open position** when the notes are spaced larger than an octave.

One or more notes in an open position triad may often be doubled.

A triad in open position may be identified by arranging the notes into close position.

6. Draw a close position triad after each open position triad. Name the triad and identify the inversion. Remember that the bass (lowest) note determines the inversion.
