Manage your saved passwords in Android or Chrome. They're securely stored in your Google Account and available across all your devices. Check the strength and security of your saved passwords. Find out if they've been compromised and get personalized advice when you need it. Gmail has always had strong security as a foundation. We work hard to protect you from spam, phishing, and malware, before they reach your inbox. Our AI-enhanced spam-filtering capabilities block nearly 10 million spam emails every minute. No. While you may see ads in your no-cost Gmail account, your emails are private. Google does not scan or process Gmail content for advertising purposes. While Gmail's features are secure enough for most users, some accounts may require additional layers of safety. Google's Advanced Protection Program safeguards users with high visibility and sensitive information, who are at risk of targeted online attacks. Learn more Gmail is part of Google Workspace where you can choose from different plans. In addition to what you love about Gmail, you get a custom email address (@yourcompany.com), unlimited group email addresses, 99.9% guaranteed uptime, twice the storage of personal Gmail, zero ads, 24/7 support, Google Workspace Sync for Microsoft Outlook, and more. Learn more Browse tips and step-by-step guides made for both new users and power users. Help Center You're never more than a tap away from your data and settings. Just tap your profile picture and follow the link to "Manage your Google Account". From your profile picture, you can also easily sign in, sign out, or turn on Incognito mode. When it comes to privacy, we know one size doesn't fit all. That's why every Google Account comes with easy-to-use controls and tools like Privacy Checkup so you can choose the privacy settings that are right for you. You can also control what data is saved in your account with easy on/off controls, and even delete your data by date, product, and topic. Your Google Account gives you a safe, central place to store your personal information — like credit cards, passwords, and contacts — so it's always available for you across the internet when you need it.
