There is also the "Dream Team" where you can choose your favourite footballers, whether they are active players or football legends, to create your original team. This is the game where real-life football and your wildest football dreams unite! Once you've started playing the game, you can learn the basic controls and how to build your Dream Team through a step-by-step tutorial that includes practice matches. An Authentic Team is a ready-to-use team that is available for you to play. In Dream Team, you can build your very own team by signing your favourite players and managers. Create your original team and take on the world in Dream Team-exclusive matchups. Dream Team Journey Concepts Your Dream Team journey will start with a squad full of original players. However as their abilities aren't very high, you should be looking into making signings. To sign players, you will need to go to [Contract]. We recommend you to check out the "Standard Player List" where you can utilise the welcome rewards to make signings. • Special Player List You can sign players that have put in top performances in real-life matches, players from featured leagues and football legends here. *May not be available in certain Countries/Regions. • Standard Player List You can sign any player of your choice here. Use the filters to find your favourite players. • Manager List You can sign managers of different Coaching Affinity that excel in various tactical setups. • Standard Player Tickets Tickets that can be earned through various means, including Event Rewards. Use these to sign players at random. • Packs Packs include a variety of novelty items such as players, managers and strips. You will need to register your signed players via [Game Plan] to have them featured in matches. When you are done building your team with your newly signed players, head on over to [Match]. • Events Experience the "hot topics" of the football season by taking part in a wide variety of Events. There are VS AI matches and User Matches waiting for you to take on. New types of Events will also be added in due course. • eFootball™ League Play PvP and VS AI matches in a league with a division-based structure. "Login Bonus" is a reward for logging into the game and can be claimed once a day, so be sure to log in everyday. With "Match Pass", you can earn rewards by simply completing matches. Friend Match is eligible too, so you can get your hands on rewards whilst playing with friends. "Objectives" reward you for completing the indicated challenges. There are many easy challenges on offer too! In "Daily Game", you will aim to earn rewards by proceeding through specific spaces on the map. By scoring penalty kicks, you will be able to move through more spaces, thus getting you rewards at a faster rate. Apart from players of certain Player Types, you can further develop your signed players. Head onto [My Team] > [Players] and select the player that you wish to develop. • Level Training "Level Training Programs" can be used to grant your players Experience Points. • Player Progression "Progression Points" will become available once a player levels up, and can be used to further develop the player. • Skill Training "Skill Training Programs" can be used to add a maximum of 5 Additional Skills to a player. • Position Training Applicable players will have a list of eligible Position Proficiencies for Position Training. Through the use of "Position Training Programs", you will be able to ease a player's Position Proficiency for a maximum of 2 positions at random. • Legacy Currency Convert a player to a Trainer, and the Trainer's Experience Points and Additional Skills can be carried over to another player. Follow these 2 steps to develop your player. 1) Level up your players by featuring them in matches, or by using "Level Training Programs" that you have received as event rewards etc. 2) Use the Progression Points that you earned from levelling up the player, and develop him via "Player Progression". • What is Player Progression? This is a function that allows you to develop your players using Progression Points. Your players acquire Progression Points when they level up. You have two options on how to allocate the player's Progression Points: "Auto Development" and "Manual Development". If you choose "Auto Development", whenever the player levels up, his Points will be allocated automatically in a way that will maximise his Overall Rating. In case you want to customise the player's stats to your personal liking, you can allocate the Points manually by choosing "Manual Development". Note that you can reset a player's Progression Points at any time. Lastly, in case you are in doubt on how to manually allocate your player's Points, you can use the "Recommended" function to allocate them automatically. • Team Playstyle There are 5 different Team Playstyles that can be configured in [Game Plan] > [Tactics], including "Possession Game" and "Quick Counter". To make the tactics work more effectively for your team, it is best to employ a manager with a higher proficiency for your chosen Team Playstyle. [Tips] Boosters Some players will possess a special feature called "Booster". "Boosters" serve to enhance certain Player Stats, allowing you to perform Player Progression on a player and take them beyond the ceiling of 99. There are some players that have a "Booster Slot" where they can add an extra Booster to their arsenal. The Dream Team experience is divided into "Phases". During each Phase you will be able to enjoy the latest football trends via in-game Events, such as PvP Challenge Events and VS AI Tour Events. By signing players that are compatible with an Event's theme and adding them to your squad, you will have an advantage in the Event. Create a unique team for each Event along with the powerhouse Authentic Team or personally forming the team you like through the Dream Team. Opting to play with the Dream Team will allow you to train your lineup into your preferred playing style. Once you are satisfied with your team's growth, you can then sign them to join different division-based tournaments, eFootball leagues, and other events that can give the club a plethora of rewards. The game is composed of many popular football clubs around the world. This includes Europe which houses AC Milan, Internazionale Milano, FC Barcelona, and Manchester United, as well as other famous teams from Central and South America. Grab the once-in-a-lifetime opportunity of signing up various living legends such as Kaká, S. Gerrard, F. Cannavaro, Fernando Torres, F. Lampard, D. Drogba, and F. Totti. On top of that, live weekly in-game updates are implemented for game transparency. Can eFootball 2023 Run on 2GB RAM?Yes, it can! If your phone has 2GB RAM, it's good to go.
