By Laila Alvarez | Sean Gallup / Getty Images News / Getty Images Sharing Música You are written or podcasts You recorded with millions of people around the world is simply a matter of a few mouse clicks from your computer. There are so many free websites offering to host your images, video and, of course, music that sharing content has never been so easy. By simply finding the hosting site that works best for you and upload your MP3, your file will be a web link in no time. Locate the Song MP3 file on your computer. You can have a folder entitled "My Music" in your "My Documents" folder, for example, which contains your MP3s. Find the MP3 file and remember the name of this file to make it easier to upload later. Visit one of the many MP3 hosting sites. Check www.AudioHostings.com for a list of different MP3 hosting sites. Some, this kiwi6, host only MP3s. Others, however, can host MP4s, WAV or other types of music files. Look at the sites to find what you trust most. Kiwi6 and FileXoom are kind to understand and work well. After you find the MP3 hosting site you would like to use, locate the "Upload Now" or "Browse" button on the site. Find the MP3 file on your computer to upload to the MP3 hosting site. Click "Upload" and wait for the file to load the computer. You should see a progress bar to watch the upload in progress on most hosting sites. Get the link provided by the hosting site that will go directly to the music download page or a link that will automatically download the music. This link must be provided immediately after the conclusion upload on the hosting site. Now you are free to post this link on message boards or on a personal website to share with others. Remember to follow all the copyright guidelines that the music may have been attached to it. By up-to-date contributor 21 July 2017 MP3 rocket is one of the various music / video download services that takes advantage of the Gnutella network, which allows users to share their files with others over the Internet. Similar to Limewire, the program is very easy to use and offers unlimited free access to millions of music and video files. Download and install the MP3 rocket site software, but be careful. The basic version of the program is free, but you can pay up to \$ 34 for a "pro" version if you want more than the basic ability to download and share files. choose the type of file you want to download by clicking one of the icons in the left pane or select "All types". Enter the file name of the file that you want to find in the box in the left pane and click "Search" or select one of the categories of the toolbar at the top, which will give you access to the most popular music files. Select the music gamner that you want from the list in the left pane and the names of artists and music will appear in the right pane. double Click the desired artist and music and the software will begin to search for the network for all files which contain such information. They are displayed as a list in the right pane. Click on the version you want to download and the program will download it to your computer. Your download time can be affected by the computer connection that hosts the file. If you have the following connections, it may take a while for download: dial (56k) 8 m 38 s, ISDN (128K) 3 m 46 S, DSL (512K) 56 s, Cable (1024K) 28 S, T1 (1484K) 19 s. Do not click "Continue" on the MP3 Rocket home page, if you want the free version of the software. Clicking "Continue" brings to a page to sign up for Pro Version, which can cost to \$ 35. To get the free version, click on the word "Download" at the bottom of the PÁ; Gina. Caution copyright or licensed files that may be available on the network. As a file sharing service, there may be many of these listed. Downloading them without paying for them is illegal. Check the MP3 Rocket website for tips on how to recognize these files. I plunk a cd recently bought in my mine CD tray. After tearing the songs into MP3 files, I put the CD in the closet where you probably will spend the rest of your days. Last year, I realized that I was buying CDs mainly so I could rip them into MP3s to play my computer and my iPod. I connect my laptop or iPod to my estourn at home; I hear mp3s in the office; I even use a FM transmitter attached to my iPod to convey the tracks through my car reo. With the explosion of digital music download shops as iTunes Music Store and Msn Music, I wondered: Have CDs become intermediates in accordance with me and my music? I decided to try a fully digital life to see if I missed the brilliant plastic discs. Digital download from Sites therherher's no shortage of places to buy digital music these days: It seems like a new sprout every day. Even Wal-Mart - a shopping bastion, joined the digital download fight. I tried the main names to see if they could get to know my needs. Music Shop; Apple's digital music store provided the template for the recent entries in the market. The iTunes Music Store looks great and is a fitting to use. Recent updates have added video and community resources like Imix, a way to publish your favorite reproducing lists. Read more about the iTunes Music Store in the review of the PC Review. msn Music. Microsoft was a late entry in the digital music game, launching your website in the autumn 2004. From the beginning, the giant Redmond fixed his gaze on the Apple. MSN Music is the only site to compete with the number of iTunes Music Store tracks: Both have about a million available. MSN MUSIC has more jazz and classical music than the iTunes Music Store, but in other areas fall short - especially when it comes to creating a fun vibe as Apple has. You can find more details in the review of the PC Music. Real Music Store: Real offers a good alternative to great guys. It has a clean interface that is easy to navigate. Until it shows a discography of an entire artist, even if you can not buy the Album through the service. Your biggest advantage comes in sound quality - with ripped bands in 192 Kbps AAC Format, your music sounds much better than Apple's S or Microsoft. Read the magazine of PC Real Music Store. Napster: Napster adopts a different approach to digital music: You pay a monthly fee for unlimited flows and downloads that you can play as long as you keep your signature of \$ 9.99 pay. In the past, you could only reproduce these tracks on your PC or pay 99 cents to buy them and you could get them on CD. With your last update, you can transfer music to a compatible portable player - that is, you could instantly create a cyclogue of a thousand music (or more - Why stop there?) For a signature monthly \$ 14.95. The possibilities are attracting. Read more about Napster in the revision of PC Magazine. fight for your rights with all these stores that I had little problem to find the music I wanted to buy. But what I could do with the files I bought was much more limited. When you have a CD, you can make his copies for your own use; Rip it to the digital format in any sound quality and burn it on a CD-r as many times as you want. With digital files, digital rights added to the file by copyright owners determine what you can do with it. For example, with a purchase range in the iTunes Music Store, you can play the file on five computers at the same time and record a single playlist seven times. While I have not yet been to the limit of burning, knowing that I can not make as many copies as you want is boring. And you can only hear the files on the iPod line of Apple's portable players. Most digital rights works in ways - restricting what you can download a file for, how many times you can record a track and how many computers you can share it with. Microsoft has recently launched your Digital Janus Rights technology, which gives copyright holders Additional options to offer you. Among other things, technology allows you to transfer music songs A portable player of subscription services like Napster, even if you are just "stating" rights for tracks. Of course, you need a compatible portable player. The ears have that you do not have a problem with digital rights, you have only one more obstacle to clean to lead a free lifestyle of CD: sound quality. Digital files offered by large downloads stores, including AAC from Apple and MSN Music WMA, use the compression music. A uncompressed music from a CD would require about 10 MB of space per minute, making heavy files à € à € - to download the Internet. When using lost compactness, the files are shrunken to more manageable sizes, playing the frequencies that most people have a more difficult audience. Learn more about the lost compactness in the digital digital extremetech. Because the files that you buy use the lost compression, they will never sound so good to know listen as the source CD. But you may not care. And some stores like real music store are offering higher trails to make it easier to escort cds. smaller sites as disclosure now offer coded tracks in non-loss compacting schemes such as the codec Udio without free losses (FLAC). Formats such as Flac sound very close to the original CD - but the sizes of the files are large. And you still will not find tracks find Major-Rotulos artists in non-loss formats. This is the tradeoff. not, even though I enjoy the portability and flexibility of the digital music files, I am not ready to swear CDs yet. I miss the high fidelity of the Audio CD, especially when listening to jazz and classic through a high level estate. From current contenders, iTunes Music Store has the edge because of the selection and its compatibility with portable iPod players. But the real music shop is worth a look "especially because of the best sound quality it offers. Even that Apple offers all tracks in iTunes Music Store in a lossless format and releases a 100 GB iPod for me. To store them, I will still have CDs Collecting dust - except when I need to remember how they sound. Michael Gowan writes for several publications on music and technology, and often about both at the same time. Time .
