However, mechanical faults are not the only challenges that players have to endure! In every game, one or more players have actually been replaced by shape-shifting aliens bent on sabotage and murder, pitting both regular crew and alien impostors in an impossibly fun game of cat and mouse, with elevated stakes, unpredictable tactics, and fun exchanges between players. Built for fast gameplay, a wide array of tactics, several victory scenarios, and countless ways to make each game completely different from all others, Among Us for PC represents one of the most fun and easy to play cooperative experiences released in past few years. Among Us game via emulators BlueStacks and LDPlayer offers one objective to each part of the ship crew. The regular human crew is tasked to fill the group taskbar by competing maintenance tasks all across the ship, reacting quickly reacting to impostor sabotages, report any strange findings, hold emergency meetings, or ejecting the impostors from the ship. On the other hand, alien impostors only have to kill the crew in whatever way they manage, preferably by remaining anonymous, blaming some other crewmember for sabotage or kill, anonymously offing crewmembers when they are away from their friends, and quickly moving across the ship utilizing the hidden vents. Since the game is fully focused on cooperative gameplay, the developers of this app have enabled complete cross-play matchmaking for PC, Android, and iOS gamers, with support for both local LAN and Wi-Fi user discovery and online matchmaking for 4 to 10 player matches. The visual style of the game is simplistic but still eye-catching and detailed enough to provide a wide array of fun environments, gameplay tactics, and random systemic events that can surprise the players. Customization of the crew members is limited to only basic suit color and hat design. After it arrived on the gaming scene in 2018, this casual survival game has become a true hit among novice and young PC gamers, enabling them to experience engaging cooperative gameplay with a healthy dose of casual deception, turmoil, and friendly competition. The game has a built-in text chat function and deep integration with the Discord app for streamlined voice communication. Developed by the team at Innersloth, Among Us offers hours of fun in a minimalist gaming environment. Part of the social deduction genre, the game takes place in a spaceship and consists of crewmates and one impostor. The task is to find the impostor before he or she ends up killing everyone! What is Among Us? Among Us is a cross-platform multiplayer video game where 10 random players find themselves in a spaceship or alien headquarters. Each player is assigned a role of either being a member of the crew or an impostor. At any given time, players can create a party of up to 4 people and join the game. You can also play the game online or on a local Wi-Fi connection. What is the goal of Among Us? It is a survival game, where crewmates must complete the assigned tasks and vote out the impostor. On the other hand, the impostor must kill the entire crew or sabotage the completion of tasks. If you get dropped in as a pretend crew personnel, the game turns a lot more fun, as you get to kill everyone one-by-one before you're discovered! The game takes place on a spaceship and offers 3 levels. Players move around this alien ship using basic forward, backward, right, and left movements. Each player must move from one room to another, completing tasks without giving others any reason to vote them off. Only when a player dies can the crewmates talk and call an emergency meeting to discuss and remove a suspicious player. In case the game consists of 10 players, you can choose to have more than one impostor. Doing this turns the game more fun and sends crewmates on a wild goose chase pinpointing the killers. Additionally, crewmates that are dead turn into ghosts and can sit back and watch the rest of the game play out. The game features 3 maps when you play Among Us on your Windows device, you get access to a total of 3 maps: The Skeld, Polus, and Mira HQ. The default map is The Skeld, a spaceship featuring a circular layout with well-balanced spaces and bottlenecks. This map gives very little space for impostors to kill members without being seen. The other two maps are far more vast, thereby giving the impostor more advantage. How do you kill in Among Us? As an impostor, you must wait in the shadows and sneak up on other players announced. As soon as a crew member walks by, you can jump out from your hiding place and kill them before they get a chance to report your identity. For instance, when a crew member is finishing a designated task in the laboratory, you can kill them, switch off the lights, and hide in any of the vents to kill another member. What are the impostors in Among Us? The impostor in Among Us is a role assigned at random to any one of the total 10 players. The remaining players enter the game as crewmates. In the game, the impostor is a shape-changing alien that looks like the other crewmates but is only there to sabotage the ship and kill all players in the process. Does the game offer any customization options? Among Us characters are unique because the game offers a range of fun and quirky customization options. Crew members have an option to select a costume, play with different colors and skins, and also hang around with a hamster pet. The game features sticky notes, toilet paper, and other random items to add a touch of comedy to the chaos. Does the game have high-end graphics? Among Us doesn't have high-end graphic elements, nor does it feature any note-worthy sound effects. Instead, the game offers a minimalist design that tends to appeal to people enthusiastic about meme culture. The game doesn't last long, so you can play it for 10 to 15 minutes and then get back to work. The only drawback to the game is that sometimes players leave the game in the middle, or you end up waiting in the lobby for a game to start. What are the platforms where Among Us is available? Since the Among Us game offers cross-platform support, you can play the game from your Windows 11, 10, 8.1, 8, 7 devices or your Android or iOS phone. The latter two are available for free and only feature some in-game purchases. Why is Among Us so popular? While Among Us online was released in 2018, it only started rising in popularity in 2020. There are multiple reasons behind this, one of which was the simple gameplay that it offers. The game also became popular because prominent Twitch users started streaming it, users began creating a lot of fan art, and memes of the game also started circulating on social media platforms. Are there any alternatives? Fall Guys - Ultimate Knockout is a game that's very similar to Among Us and features a total of 60 players. In case you're looking for a game that takes place in space, you can't go wrong with Neptune Lander Elite. Other fun games that you might want to check out are Brawl Stars and Armed. Fresh and huge updates! As the Among Us game grew popular across different countries and a variety of ages. It became a challenge for the team to offer something new while still keeping the original play that many loved intact. To add a more challenging level of complexity, four roles were added to the game. Extra crewmate roles—Scientist, Engineer, Guardian Angel—and refreshing impostor role of Shapeshifter are available to be enjoyed in the game along with your family and friends. Just like before, the roles are highly customizable to your preferences. Cosmicubes, on the other hand, are their answer to players' clamor for more cosmetics and progression show-off. your elegant gear collection.
