Finally, the game improves a lot when you use the controller instead of touching the screen. Top 10 Android Flight Simulator games today. There are many flight simulator games on Android, and we've tested and reviewed the best ones. So fasten your seat belts as we get up! 1. Endless Flight Simulator - \$4.99 - in-app purchases or do you want to fly a cool plane? With Endless Flight Simulator this can be done easily. The app provides a complete flight simulator on your Android device and provides a great experience. PriceData about this experience is clearly visible in the application itself. The planes are carefully designed and detailed to rival their real counterparts. The app makes it possible to have a flight experience on a portable device like never before. Details such as weight, balance configuration, weather, weather conditions and other factors play a role in the game. For infinity and beyond, the only downside is that the game always offers integrated purchases (IAP). Most players believe that once they have paid for an application, they should offer everything, including updates. Infinite Flight Simulator is a bit expensive and yet there are IAPs. It's an excellent flight experience, but expensive overall, for Android. In-Purchase: \$2.99 to \$49.99 per article Features: Contains 17 aircraft. Flight Simulator app has 14 regions to be amazed. It also has a major newspaper. Notable characteristic: Application is provided at all major airports. This is an important point, but the app goes further by providing accurate departure, track and roller coaster. Proconsonia can be subscribed to Infinite Flight Pro to unlock all planes. The Pro version is too expensive. Contains real navigation data, including airspaces, navigation aids, SIDs, stars and approaches, supplied by NavBlue. The game is a bit slow - use the flight planning system with precision fixes and navigation aids. There are no moving vehicles and no announcements for passengers. 2. Air Navy Fighters Free and \$4.99 Air Navy Fighters This is a simplified Android flight simulator that will keep you on the trot. It is not a simulator per se, but it contains some of these aspects. We only adopted this because some may want to fly military fighter jets that can actually get into combat. The graphics are good, but the gameplay is very well done, especially considering the touch screen controls. Unforgettable battles in the characteristic sky: an excellent system for generating weather conditions. Different times of the day are included. Tutorials are over. Notable characteristic: The application successfully mixes simulation and arcade action. If you are looking for old jet action, get this game. With the paid version of the app, you can download new missions for new scenarios. The light version only has a free flight mode. You can download the paid version of the game from the following link. 3. Flight Pilot Simulator 3D flight pilot simulator 3D near ultra-realistic and very beautiful 3D graphicsIn this game, various real aircraft are presented. This includes single-engine aircraft, military aircraft and supersonic aircraft. Beautiful graphics and simple interface tasks can cause a lot of pleasure - your emergency tasks, your unprocessed take-off, your run and your fires. Rescue tasks are also interesting - your goal is to save women and children from various situations. Related: Battle Royale's best games for Android are completely free, but include advertising. But advertising does not interfere with your game experience. Features: Super -realistic intuitive control elements in HD format and simple interfaces do not require Internet connection - play where you want to play an important feature: the game offers a huge number of aircraft. It is also the actual diversity, which is fun, as well as the quantity. You will never be bored, as you can fly on many different aircraft. Proconsflight Pilot Simulator 3D does not require Internet connection, you need to sharpen the screen. These are funny and complex tasks. 4. The 2017 flight simulator simulator of the 2017 aircraft flight simulator, as in the previous game, the aircraft flight simulator has many real models. After passing a brief leadership, you can introduce tasks or play in them in free movement mode. Planting can be difficult, sometimes you get game loans that allow you to buy better and fastest aircraft when you perform tasks. The game also imitates air ratings, turbulence, rain, storm, smoke and similar elements of the world. In the open world there is a lot of content for opening and collecting, giant and high quality. Built-in cameras are great and will give you an excellent view of the aircraft. Features: Commercial aircraft Unique tasks and goals important features: The real system of awards in the game gives great pleasure. He can entertain you for hours. Proxe has many unique flight tasks and goals. The sound is free from old versions, the game constantly freezes. 5. Combat cover of a combat helicopter The Android flight simulators have many helicopters. We had to include this application, not because it is a simulation, but because there are surprising helicopters. An impressive multiplayer fight, the application is less simulation and increasing action, but the control of slopes in combination with outstanding helicopters makes the game a joy. The application is delivered with the help of realistic and highly detailed helicopter models from key manufacturers. Characteristics: Real flying places. Noteworthy feature: The game has mechanisms that can be found in the best Android RPG. During progress, you can improve and improve helicopters, which makes this experience much richer. Complete missions with friends, if you like helicopters, you need to try this game. Many helicopters and adrenaline fighting in real places are simply ideal. Proconstrutti LV 8 players from "Free for Tous" and Team Deathmatch. He has many problems with failure. Personalize your Warbird with many ice personalization and camouflage options. The apocalyptic, from the city to the desert Arctic station. Get one of the Android Flight simulator games. The game allows you to pass one of the best combat airplanes with a specially designed landing system. Lowering at the airport is one of the most difficult tasks. The landing track is only 150 meters long, which is small enough to stop the airplane. The application strictly repeats the voltage. The graphics are very good functions : Come with 6 training missions that will prepare you. The global classification competition is a descent. The camera system and reading features are perfect. Noteworthy feature: The application lets you connect two devices to be one of the most stylish android flight simulator impressions. You can use one device as Controller and each other. Prossonis is a playing campaign with 6 training missions and 30 missions in 5 different scenarios. Gyroscope sometimes doesn't work. Free flight of weather and hours when the flywheel adds a significant delay in flight recordsRealistic extreme conditions with wind, rain, snow and paid version of the game unlocks everything in a free application. Of course, you can buy the things you want in your free app using purchases in the app, but if you want the entire package at once, you can download it here. 7. Free X-Tarpuain with purchases in X-Plane 10 X-Plane 9, one of the good games for the Air Android simulator, the simulation takes seriously. The application brings everything you would expect from the competent application of the Air Android simulator. The application is a Gold Standard for a careful flight simulation that offers features that make the flight on mobile devices as realistic as possible. One of the most surprising things we found in the game is that it contains a failure of the simulated system, a function that other games of this kind are missing. The night flight is an excellent experience: it is provided with 2 free planes. Others are available via IAP. Fly Fly Day, Night, Dusk or Dawn. Fly flies in different weather conditions. Completely interactive cockpit. excellent characteristics: applications of applications react very quickly. They even ask them to call or send them an e-mail when they have problems. Advanced departures are supported by many planes. It is a pay-to-play and has only 2 aircraft and very few maps and missions available for free. 2 players' internet multiplayer via game center. It cannot be used on all platforms. It has interesting combat missions. It contains many mistakes. 8. Picasim - Picasim free and \$ 3.50 is now something extremely useful. This app, which may seem like a mix of Pokémon and Sims, is actually a good remote control of the aircraft simulation. Control of the aircraft and the answer is a very narrow real experience. Characteristics of nice small planes: clear graphics that can work on smaller devices. It comes with advanced mechanics and control. The application has several points of view. Remarkable feature: although the graph does not load the material, some places are actually quite stunning. The application really improves the flight experience with your RC plane outside. The prerequisites have a vast selection of planes, different land for years and many settings, so you can configure them as wishes or creating your land to fly. The control is a bit difficult. Picasim is completely free. The multiple control mode with multiple auctions has problems. No announcement in the appli's not even real art. The free version of this broadcast for Android contains absolutely no ads, which in itself is very cool. However, the paid version is available with races, additional planes including a quad and new scenery - feel free to download it from another link. 9. Fly Hawaii - Want to fly a flying plane in Hawaii Hawaii? Better yet, fly to Hawaii on 42 different planes? This free flight player for Android allows you to do just that. The game itself is beautiful, with lots of tutorials to help you get used to the game. Initially, the game only offers 2 planes, but if you like the game, you can buy more or earn more. Just keep playing. A true Hawaiian experience. In-app purchases: \$0.99-\$11.99 per theme. Great feature: the maps are incredibly detailed and Hawaii looks great from a bird's eye view. Plus 42 different planes including various planes, planes and helicopters. The gameplay is very limited. It has a great camera review. Earth. 10. Ruthless radio controlled aircraft trainer - free in app purchase. Radio Controlled Absolute Aircraft Simulator is another good radio controlled aircraft simulator but with even smoother controls. There are only two joysticks on the screen and with their help you can fully control the virtual plane. The controls may take some time to get used to, but once you get used to them, everything will work smoothly. Exclusive RC Plane Purchase Experience: \$0.99 \$19.99 each Features: Includes 4 free models. Another great feature is the camera. It is equipped with a good air system. Great feature: This is the only app that also includes cars and boats from the list of Android games. Unfortunately cars and boats don't fly. The PlusMinoset program will save you many dollars and many days of waiting for spare parts for your models. Contains ads. Perfect for experienced models and even better for kids. You cannot use any car without buying it with real money. The fixed point camera that shows the image of the RC remote also has a tracking camera that follows the model. It has an unfortunate graphical evolution. FAQ yes, they are, but not quite. Avia computer systems can give you that experienceLike a real plane. These games are more than games, they are less than a simulator. Our choice would certainly be a flight simulator of the plane. This game is closer to the flight coach. If you are tired of preparing Huberts and Aeroplani, the best solution is the space flight simulator. Free game with incredible and open universe and mechanical realistic orbit. Release the thirst after the flight! Complete the first 10 Android flight simulator games. We hope that these programs meet your desire to fly. Of course, they are not as sophisticated like teachers on a personal computer, but they still do an excellent job. If you are interested in simple simulator games for Android, you should definitely try at least one game from the list. If you have offers or your phone has another best flight sim game, let us know in the comments below. With.
