now apply the  
download  
wallpaper and  
go to home page.

- First download and install below apps
- 1.kwgt widget maker
  - 2.kwgt pro key
  - 3.nova launcher
  - 4.RedLine icon pack
- links are in description and in my blog

How to make your home screen better. Cool home screen setups. Android home screen setups.

The home screen is one of the most important aspects of the smartphone experience. This is where you use apps, browse the web, check widgets, and do more. Android allows you to customize this experience however you want. In addition to the default customization options, Google Play has many great apps for customizing your home screen. Let's take a look at some great apps you can install to customize your Android home screen like a pro. 1. Wallpapers background images 3 images Finding new and unique wallpapers can become a process, not time. So why not let them use the Pedal app for you? Wallpaper is an elegant app that automatically creates new wallpapers for your home screen. This can be done once a day or even every hour. In addition, the wallpaper does this on your device and does not require an internet connection. You can also manually select a scheme of your choice, apply effects and easily change the color. However, apps are much more fun every now and then and surprise the random background with something special. Download: Wallpapers (Free Purchases, Apps Available) 3 New Images is one of the best Android launowers and offers so many customization options for your Android home screen. It is smooth, runny and easy to use. The main entry and screen changes completely during the default phone launcher. In addition, it offers a variety of widgets, icons and labels to make your phone attractive and easier to navigate. Nova is not your only choice. You can also view lists of these lightweight launchers and minimalist launchers. If you want to customize your grandparents home screen, we also have a simple list of launchers. Download: Nova Launcher (free version, premium available) 3 images As the name suggests, ICON Pack Studio will change the application icon on the home screen, provided that you use a compatible jug (and most third parties are also included with Nova). Unlike other icon packs available on the Play Store, this app allows you to create icon packs and customize the icons according to your taste. The app offers several icon customization features. For example, it is possible to change icon shapes and sizes, as well as add filters and special effects to application icons. By defining a scheme, you can easily change the appearance of the phone icon with a single touch.Your home screen is one of the most important aspects of your smartphone experience. This is where you launch apps, search the web, control widgets, and more. Android lets you customize this experience however you like. In addition to the default customization options, there are many great home screen apps on Google Play. So let's take a look at some great apps you can install to customize your Android home screen like a pro. 1. 3 Image Wallpaper Searching for a new and unique wallpaper can be a pretty tedious process. So why not let the app change the wallpaper for you? Wallpaper is a great app that automatically creates new wallpaper designs for your home screen. You can do this once a day or even once an hour. Plus, the wallpapers do it on your device and don't require an internet connection. You can also manually select a design of your choice, use effects and change its color easily. However, it's much more fun to let the app generate random wallpapers so that it surprises you sometimes with something special. Download: Wallpaper Wallpaper (Free in-APP purchases) 3 images Nova is one of the best android launcher operating system that offers many modifications to your android home screen. It's sleek, smooth, and easy to use. Because it replaces your phone's default launcher, it completely changes how your home screen looks and works. Moreover, it also provides various widgets, icons and labels to make your phone attractive and easier to navigate. Nova isn't the only choice. You can also check out these lists of lightweight and minimalistic launchers. We also have a simple list of launchers for seniors if you want to customize home screen for grandparents phones. Download: Nova Launcher (Free, Premium) 3 images As the name suggests, Icon Pack Studio changes the app icon on your home screen if you're using a compatible launcher (and most third-party ones, including NOVA). Unlike other icon packs available in play store, this app allows you to create your own icon packs and customize icons according to your taste. The app offers various icon customization features. For example, you can change the shape and size of icons and add filters and special effects to your app icons. When you set up the template, this makes it easy to change the look of the entire phone icon with one tap.Finally, you can also use the third icon pack with the icon pack, making it a complete solution for customizing icons. Download: Icon Pack Studio (Free, In-App Purchases) 3 Doodle images are perfectly designed to customize your home screen with high-quality live background images that offer smooth animations. It is an easy to use application without advertising or purchase and with high customization flexibility. After downloading the app, it allows you to prepare a live background by experimenting with different options. You can change colors, patterns, and more, and suggest changing icon shapes. Download: Doodle (Free) 3 Pics KWGT is a great Android home screen personalization tool that lets you create your own home screen widgets. You can use Wysiwyg to create your own widget design (that's what you get). With KWGT, you can create digital or analog clocks and other widgets for weather, music, alarm, information, and more. In the featured section, you'll find over a thousand widgets to choose from and tons of design options to customize your widgets. Download: KWGT Kustom Widget Maker (Free, available on Tex) 3 photos If you're a little too Kustom and just want a good weather widget, Weavow lets you pin them to your home screen. You can customize this ad-free widget to your liking and provide fairly accurate weather updates for your region. Select your current location to run, then you can start the adjustment process. When you're happy with your selection, click Create to add this widget to your home screen. Displays daily, hourly and weekly temperature, humidity and other weather information. You can also allow reporting of daily weather forecasts. Download: Weavow (free in-app purchases available) 3 images is simply a home screen task list widget that lets you create categories, add new tasks and events, and mark them as complete on your home screen. This widget is very useful and helps you remember things while looking at the home screen. Items also allow you to add notes. You can download a nice to-do list from Google Play, but this widget has a unique way of achieving the same goal without requiring a proper app. Download: Items (Free Purchases Fees) 3 Genie PicturesYou can customize the app drawer on your Android phone. If you have many apps on the phone, Jina is very useful to organize them according to your needs. In addition, it offers incredible customization options. The app allows you to create folders to group similar apps in one place, which helps you organize your apps. In addition, you can select a list of favorite programs that you can access from a small card that you can easily place in any area of the screen. Jina has a sliding side menu that allows you to view your apps in alphabetical order directly on the initial screen. You can also rename any app and place it where you want in the list. Download: Jina Drawer (free) 3 Sesame images is a powerful tool that creates shortcuts on the initial screen and allows you to look for anything on your phone. You can also customize keyboard shortcuts using sesame. The app is easy to use and easy to customize with fantastic features that allow you to disable or modify specific phone or app features. After installation, it is necessary to allow him to access all applications and relevant data. It is therefore possible to start the personalization process and create a highly accessible research that improves accessibility and overall efficiency. Download: Sesame Search & Shortcuts (available in-APP purchases) The customization apps of the initial Android screen are useful to make the phone interface more elegant and easier to navigate. You will have fun using your phone when you have the exact interface you want. We have selected these apps among the many apps available on the Play Store. So try them to completely change the user interface of your phone. Android is known for his personalization options. You can customize almost every aspect of Android as icons, backgrounds, navigation buttons, notifications bar, start of apps. The settings of the initial Android screen are a set of customizations designed to obtain a unique aspect that can be based on any theme, for example by creating the initial screen in this way. These changes are made by a fantastic community on Reddit and other social media platforms, in which the community shares with all the favorite changes of the Android initial screen. You can use them to make your device equal. Some apps that must be installed according to the setting chosen becauseThey have special features and unique layouts that can sometimes be triggers, widgets or a navigation bar, so make sure to consult their Android adaptive applications for a full list. Android home screen settings that you can find here, you can use them to customize your inspiration or customize the arrangement of your Android home screen.
