More details Today, 6:40AM UTCDevastating deluge in the snowfields For all of Stanley Bing's columns on TheStreet.com: click here.Out in San Francisco, where I live far too little of the time, it has been raining for about two months on and off. Sometimes it pours buckets. Other times it just sort of drips down all day in a gray haze. "I might as well be living in Seattle," my wife said to me the other day. In Los Angeles, where the climate is one of the only true reasons to reside, things are scarcely better. Several weeks ago, it rained horribly for about 10 days and was cold after that. San Francisco weather? Today, on the other side of the country, in Washington, my friend Frank is still digging out of a freak, mountainous snowfall that buried his house last week. Another 20 inches, they say, is on the way over the next couple of days. In the meantime New York, where I am right now, has received little more than a desultory dusting. In other words, Washington seems to have New York's weather. It's so bad down there, in fact, that Frank can't make it to the staff meeting, and he never misses a staff meeting. There's only one conclusion I can reach in this situation. The climate is changing in a very specific way: The weather is moving south. If what I believe to be happening is true, the implications for business are vast. The South will no longer be the land of juleps and lazy dogs sleeping in the sun. It will be cold and enterprising, filled with energetic folks rushing off to be in their warm workplaces. The Pacific Northwest, now free of its lousy weather, will stop hunkering down inside its coffeehouses, put on a tie, and get to work. Los Angeles, suddenly afflicted with Bay Area weather, will empty out almost entirely, at least of show business people. Where they will go I don't know. Boston will of course be like Canada, but that's no change for them. Aside from the six tolerable weeks in September/October each year, it always has been. And Canada? They will be even more smug about themselves than usual, because now everybody north of St. Louis has their lousy weather. The impact on New York is still unclear. It should be horrendous here right now, it being February, but its not. There's a little snow on the ground this morning, but it's not what the shrieking, screaming, sweating, gesticulating, eye-bulging, doomsayers who deliver the weather on TV prognosticated. It's a little snow. We can live with it. In fact, it's one of the warmest winters I can ever remember. This global warming isn't all bad, at least when it comes time to put on your wing tips and get to the office. You can catch Stanley Bing at twitter.com/thebingblog. UNSETTLED & SEVERE WEATHER OVER THE COMING DAYS «Canterbury Weather Updates Strong Wind & Rain Warning updated at 8:30am Friday morning; additionally, Special Weather Advisory in place & road snowfall warning Good morning. Our next front in the Tasman moves north today, bringing another intense period of heavy rain to western areas and gale force winds in the east. Our strong wind and heavy rain warnings remain in place for Friday and Saturday. Check into your town page for specific and moderated wind and rainfall details on Friday/Saturday - there will be contrast across the region. Many lower & eastern areas may record gusts up to 90km/hr, with winds exceeding 120km/hr about the foothills and up to 150km/hr at higher elevations. Unsettled weather continues into Saturday, with cloudy and wet conditions for most, before we see improvements late afternoon/evening. Very cold air arrives on Sunday, with a prolonged period of south/south-easterly showers and snow to very low levels. There is growing indication that snow may lower to very low levels from Sunday night, through until Wednesday evening or even Thursday morning at various levels of intensity over this time frame. Currently there is high risk of snow to 200-300m, with moderate risk of sleety falls to sea level. Members - this period is now coming into town pages and we have a Special Weather Advisory in place and road snowfall warning, with full details. *Members - keep up to date with our 'Live Weather Feed', town pages and warnings for all the latest information. YOUR DAILY 'HIGHS' FOR FRIDAY AT 5PM - brought to you by The Heat Pump People Click on the headings to expand Another active front in the Tasman moves north today, bringing a short period of intense weather, with heavy rain for the Main Divide/Headwaters and nor-westerly gales for eastern parts of Canterbury. CWU warnings remain in place. We're watching very cold air, rain and low snow from Sunday evening through until middle stages of next week. Snow may lower to near sea level at various stages, with high confidence of snow to 200m. A special weather advisory is in place, with more details. Please source town pages for specific details and keep up to date with our 'Live Weather Feed' for all the very latest information. GENERAL TWO DAY SUMMARY FOR CANTERBURY - PLEASE CHECK YOUR TOWN FORECAST FOR MORE SPECIFIC INFORMATION TODAY High cloud thickening in the east, with strong northerlies developing, possibly gale at night, turning gale nor-westerly about the foothills and severe gale about the high country. Heavy and significant rain setting in about the Main Divide & Canterbury Headwaters - falls spreading into the Mackenzie Country, gradually moving north at night, with spill over rain reaching eastern areas, heavy and significant 25km to the east of the Main Divide. Mild temperatures in the east. H: 14-18 L: 6-10. SATURDAY Heavy and significant rain about the Main Divide & Canterbury Headwaters early on. Scattered rain in southern and central areas, moving north through the morning and easing late afternoon or evening. Strong northerlies easing back. Mild temperatures north of Rolleston. H: 11-9 L: 1-10 Source your town pages for 1-7 day forecasts for 2-7 towns across Canterbury - no computer-generated content and specific information for each town. 22° 18° 15° 15° Today4 Aug 26° / 17° 9 - 20 mph Tomorrow5 Aug 70% 0.6 mm 24° / 15° 11 - 25 mph Saturday6 Aug 22° / 12° 7 - 19 mph Sunday7 Aug 25° / 12° 7 - 21 mph Monday8 Aug 23° / 13° 10 - 22 mph Tuesday9 Aug 23° / 14° 12 - 27 mph Wednesday10 Aug 27° / 16° 12 - 27 mph , 4 August , 5 August 17:00 25° Cloudy Feels Like 26° Northeast 4 - 16 mph 2 Low SPF: no Rain 0% 0 mm Humidity 37% Dew Point 9 °C Clouds 74% Feels Like 26 °C Visibility 28 mi Wind - Average 4 mph Pressure 1015 hPa Fog No Wind - Gusts 16 mph Snowline 12467 ft 18:00 24° Cloudy Feels Like 25° East 6 - 16 mph 1 Low SPF: no Rain 0% 0 mm Humidity 47% Dew Point 12 °C Clouds 74% Feels Like 25 °C Visibility 25 mi Wind - Average 6 mph Pressure 1015 hPa Fog No Wind - Gusts 16 mph Snowline 12467 ft 19:00 21° Cloudy Feels Like 21° Southeast 9 - 19 mph 0 Low SPF: no Rain 0% 0 mm Humidity 62% Dew Point 14 °C Clouds 74% Feels Like 21 °C Visibility 22 mi Wind - Average 9 mph Pressure 1015 hPa Fog No Wind - Gusts 19 mph Snowline 12467 ft 20:00 20° Cloudy Feels Like 20° South 6 - 19 mph 0 Low SPF: no Rain 0% 0 mm Humidity 70% Dew Point 14 °C Clouds 81% Feels Like 20 °C Visibility 22 mi Wind - Average 6 mph Pressure 1015 hPa Fog No Wind - Gusts 19 mph Snowline 12467 ft 21:00 19° Cloudy Feels Like 19° South 4 - 11 mph 0 Low SPF: no Rain 0% 0 mm Humidity 75% Dew Point 15 °C Clouds 72% Feels Like 19 °C Visibility 19 mi Wind - Average 4 mph Pressure 1016 hPa Fog No Wind - Gusts 11 mph Snowline 12467 ft 22:00 18° Cloudy Feels Like 18° Southwest 2 - 19 mph 0 Low SPF: no Rain 0% 0 mm Humidity 80% Dew Point 15 °C Clouds 93% Feels Like 18 °C Visibility 19 mi Wind - Average 2 mph Pressure 1016 hPa Fog No Wind - Gusts 19 mph Snowline 12467 ft 23:00 19° Cloudy Feels Like 19° North 5 - 9 mph 0 Low SPF: no Rain 10% 0 mm Humidity 73% Dew Point 14 °C Clouds 93% Feels Like 19 °C Visibility 19 mi Wind - Average 5 mph Pressure 1016 hPa Fog No Wind - Gusts 9 mph Snowline 12139 ft 24:00 19° Cloudy Feels Like 19° North 8 - 15 mph 0 Low SPF: no Rain 10% 0 mm Humidity 78% Dew Point 15 °C Clouds 82% Feels Like 19 °C Visibility 16 mi Wind - Average 8 mph Pressure 1017 hPa Fog No Wind - Gusts 15 mph Snowline 11483 ft Sunrise 05:24 Sunset 20:37 First light 04:44 Midday 13:01 Last light 21:17 Day length 15h 13m Remaining daylight 15h 13m Thu 4 Fri 5 Sat 6 Sun 7 Mon 8 Tue 9 Wed 10 Thu 11 Fri 12 Sat 13 Sun 14 Mon 15 Tue 16 Wed 17 Photoprotection (SPF): More information Detail High Mugwort (336.39 #/m³) At home and in the car, keep the windows closed and use an air filter and/or cleaners. Prevent the use of motorbikes or bicycles. Wash your face and hand conscientiously. Change your clothes and shoes when you arrive home Avoid green areas. If needed, use protective glasses and a mask.
