For some reason this game interest me its simple but fun with a great setup and its a game to pass the time and just relax. I gave it 5stars because i haven't had a single issue with the game play and i think they hit the nail on the head for what they were aiming for considering the creation of this app. One thing i would add is more events like double elimination tournaments or round robins and maybe being able to customize your character and add some more ways to earn cash because lets face it pay to win games can be frustrating. So all in all its a five star game that could have a little more added but every app can always use something more thats the beauty of technology. But anyways i highly recommend the game i have not tried reaching out to there tech support but if its anything like the game i'm sure its well maintained and viable. The newest update has made this game terrible. None of it was in the notes when i updated. It changes how the aiming is viewed which is now just annoying but not game breaking, but if i shoot dead center the arrow will be a decent amount higher than that. (Decent amount meaning you have to aim at almost the bottom of the bullseye) to hit the center of the bullseye) Not really bad if you didn't have to account for wind or the movement speed of the target either. Some of the levels you play against "other players" are ridiculously fast with a lot of changes in directions which make it difficult which is fine if you weren't playing against bots which is why i put other players in quotes. I have yet to receive any of the highest tier equipment even though i have played this game everyday for the past 2 months. Yet, I am constantly playing against players with at least one highest tier equipment on and for the most part am always playing against players with all 3 equipment slots filled with the highest tier equipment. I'm pretty sure most people aren't spending \$100 or even \$20 for just one piece of the highest tier equipment, but everyone seems to have 3 pieces. That seems kind of fishy to me. We have received your feedback, the game has been changed back, the Android phone can be updated now, and the Apple phone needs to wait another day to update, because the review takes time. Thank you for your understanding. Wish you a Happy New Year! I downloaded game this morning and have played most of the day on iPhone 6plus.. I have enjoyed game. The ads are what i use to get free stuff and most are only 5 seconds long... that is way above other games already. Instead of waiting a full 30 seconds on an ad. And once you get use to the way the bow and arrow move with the wind speed at certain distances it is pretty easy and an enjoyable game. The players seem like bots and it all depends on how well you shoot to match how well they are going to shoot, at least on lower levels just starting out. The higher tier targets and levels get very hard quickly. You have to watch videos to get stronger bows and better arrows.. but 5 seconds here and 5 seconds there don't hurt anything. And before you know it you have a really good bow and really good arrows.. Top Pcmac Reviews Archery By juany3542 (Pcmac user) I love ♥ archery and darts. I used to be happy playing with my friends as teams . I used to be very happy with my friends who have lived in darts teams. My teams were in Chicago Illinois,Manhattan,Charlotte and now Duluth Minnesota for some of my friends who had left the games but I play it on my iPad and iPhone ☺♥!☺@ I even have a dart machine and my cases in my garage and I play when it's warmer than the weather. I really love this app game. I noticed that every time that I played it and my points are doing 0 and I have had been getting points and then I have to start from 0. Nice game and relaxing music Good game and really good, simple to play. The high scores are impossible to get but that's because of the time when you start to play(I'm assuming). It is easy going for anyone no truly violent times except the weapons for violence included. Otherwise great relaxing game and relaxing music to go with it as well but more songs would definitely brighten the game more. Great app This game is fun...but a bit easy. By NickNameFue (Pcmac user) As far as game play it's spot on. Fantastic look to the game. Controls are easy to figure out. And...after most matches you get a very short commercial which I'm rating as a positive. Often the adds run on and on. You watch more adds than play the game. NOT HERE!!! Adds are short gameplay is long... However the one bad thing is... It's to easy for an adult or anyone who is good at video games. I kept waiting for it to get more difficult and after 20+ levels it's pretty easy to get all bullseyes It's a great game, it just needs the easy, med, or hard option. Hahahah Ya I said that☺ that's why I gave it ☺☺☺ out of 5. If it had an adjustable difficulty for sure this would be a ☺☺☺☺ game. Oh and if you all are the same people who put this out in gun form...that was really fun as well, but....a bit to easy. ☺ & ☺ Much better.... I've tried other archery games, this is the best. It give the player a fair chance at hitting the targets, other games make the objective too difficult, for various reasons. From fantasy to the Olympics, archery has held its own throughout various time periods and has managed to stay relevant. While no target practice game can happen without scoring, the game's online platform pits players against each other via a scoreboard system - perfect if you'd like to test your skills against the best. It's survival of the fittest, as players must choose their favorite stickman warrior to defend themselves against other archers, orcs, and other monsters. While the design is relatively simple, it is truly an intuitive product that is satisfyingly complete and allows players to truly express themselves and how they want to go about honing their skills. This game is free to play. Read:Best Mountain Climber Games for Android and IOS Ninja Creed If you've ever been a fan of Assassin's Creed, this title will appease your need for stealth just as well. Ninja Creed is a first-person take on stealth-based campaigns that requires you, the protagonist, to defeat enemies with nothing but your bow. This weapon is used for combat and can be fired directly at the enemy or items in your environment that could turn the tide of your battle. Much like actual combat, enemies can block your shots, which does up the stakes of every shot, but it is a thrilling title nonetheless and perfect for more invested gamers. This game is free to play. Rather than learning the ins and outs of archery's mechanics, you will get to choose a character to go on epic adventures via a leveling system. Upgrades will naturally come your way as the game progresses. Rather than mechanical skills, players will have to think on their feet to overcome the various obstacles in the later levels. This title is a five-star rated game from Enigma Gaming Studio - it is free to play and definitely worth your time. Read:Best PC Games in 2021 with the most realistic graphics Archero Archero is a game that is possibly best for children for its cartoony graphics and kid-friendly storyline. Enemies like skeletons and demons are playful at best and certainly catered for a clean "G" rating. The game is somewhat of a dungeon crawl, that has the protagonist explore the fleshed-out maps for loot, leveling, and enemies. Its premise may be straightforward, but it certainly impresses with its clean graphics, smooth gameplay, and credible rating. While this may appear to be a console game, Archero is a free-to-play mobile game perfect for the family. Read: Best Survival Games for Android/IOS
